A DEEP-TECH STARTUP

which has done for "SOFTWARE IS EATING THE WORLD"
that has by our estimation saved $345,000 in legal fees

FIRST BY DEVELOPING A BSL

a domain-specific language

THEN BY BUILDING COMPILERS

which will compile BSL

FOR A COMPLETE TECH STACK

including tools like IDEs, IDE, SQL, and HTML, which are supported by

THAT CULMINATES IN APPS

and for their fans!

WITHOUT LAWYERS

who are application writers

computational law
